Ignacio Sánchez Greppi

Full Stack Software Engineer | AI Agents & Automation

Montevideo, Uruguay isanchez.workmail@gmail.com www.sanchezign.dev
linkedin.com/in/sanchezign github.com/sanchezign

PROFESSIONAL SUMMARY

Full Stack Software Engineer specializing in web development and AI automation. Since 2023, I have built websites for clients, handling their design, development, deployment and maintenance. I work with React, Next.js, Astro, Node.js and TypeScript, with automated tests and CI/CD, and I also build AI agents for WhatsApp with Claude and n8n. I am looking for a long-term role where I can contribute full stack development with a focus on quality, security and results.

TECHNICAL SKILLS

Languages	JavaScript, TypeScript, SQL, HTML5, CSS3
Frontend	React, Next.js, Astro, Vite, Tailwind CSS, Three.js, shadcn/ui, TanStack Query, SASS, Bootstrap
Backend	Node.js, Express, REST APIs, GraphQL, Prisma, Zod, JWT, Passport.js, Socket.io
AI & Automation	Claude API (Anthropic SDK), AI agents, n8n, Workers AI, structured outputs, prompt injection defense, Whisper, WhatsApp Business Cloud API, Model Context Protocol (MCP), Claude Code
Databases	PostgreSQL, MongoDB, MySQL, Firebase
Testing	Vitest, Playwright, Jest, Mocha, Chai, Supertest, Postman, mutation testing, accessibility testing with axe
DevOps	Docker, Docker Compose, GitHub Actions (CI/CD), Git, GitHub, Cloudflare Workers, Vercel, Netlify, Oracle Cloud, Caddy
Methods & Design	Scrum, Kanban, Jira, Trello, Figma, brand identity

FEATURED PROJECTS

Freelance Web Developer · Client websites 2023 – Present

3 years and 3 client websites: design, development, deployment and maintenance

Pura Vida Paisajismo 2025

Live: puravidapaisajismo.com

- **3D garden builder:** on the website of this landscaping studio in Uruguay, visitors design their garden in the browser before work begins, and reach the studio on WhatsApp in one click.
- **AI assistant:** answers questions using only the studio's information, never makes up prices or dates, has a per-visitor message limit and a fallback model, and hands visitors off to WhatsApp with a ready-made message.
- Every change deploys automatically to Cloudflare Workers, with an automatic preview for each PR.

Stack: Astro, TypeScript, Tailwind CSS, Three.js, Cloudflare Workers, Workers AI

- **Pura Vida (2024):** first version of the brand's website, which later grew into Pura Vida Paisajismo. I led the project from start to finish: UI design, layout, development and deployment.
- **Golden Pets (2023):** first client: responsive website with a product catalog and social media integration (React, JavaScript, CSS).

SmartOps Agent · AI agent for businesses that run on WhatsApp · Personal project 2026

Demo: smartops-demo.duckdns.org Code: github.com/sanchezign/smartops-agent

3 agents built with n8n and Claude read price lists, orders and questions (text, photos, PDFs, spreadsheets and voice notes), keep the catalog up to date and notify the team only about what needs action. 2,100+ automated tests, CI/CD with GitHub Actions and prompt injection defense. **Stack:** Node.js, TypeScript, PostgreSQL, Claude API, n8n, Next.js, Docker

PROFESSIONAL EXPERIENCE

Freelance Full Stack Developer · Direct clients and Workana — 2023 – Present
Montevideo, Uruguay · Remote

- **Direct clients (2023 – 2025):** 3 websites for Golden Pets, Pura Vida and Pura Vida Paisajismo, with post-launch support and maintenance.
- **Workana (current):** building on SmartOps Agent, I offer tailored automations for businesses: automated replies to frequently asked questions, reminders and notifications via email or WhatsApp, syncing form data into spreadsheets, and automated reports.

Multimedia Designer — Before 2023
Montevideo, Uruguay

- Designed logos and visual identities for brands; I now apply this design background to the interfaces and brand identity of every site I build.

OTHER PROJECTS

- **Feria Artesanal:** MERN marketplace with a product catalog, JWT authentication, shopping cart and admin panel. *React, Node.js, Express, MongoDB, JWT*
- **Testing & Docker API:** REST API with JWT, 32 functional tests, Swagger documentation and an optimized Alpine-based Docker image. *Node.js, Express, Mocha, Docker*
- **Productos Realtime:** Product management app with instant updates over WebSockets, without page reloads. *Node.js, Express, MongoDB, Socket.io*
